

# BISON OPERETT PRO

## Detailed Specification

Operett Pro is developed together with the Royal Swedish Opera. It is suitable for musicians that have strict requirements on a flexible chair that is easy to adjust. The chair can be adjusted in several ways to achieve the optimal sitting position during longer performances. With a stepless adjustment of the back legs, you can easily change the inclination of the chair. The height and depth of the backrest are easy to adjust and the curved part on the backrest makes the seat adapt to the inclination of the upper body. The seat of the chair is flat which gives you a good posture. Operett Pro is light in weight making it suitable for touring orchestras with high requirements. The chair is stackable and can be used with our specially designed transport wagon. It is also available without adjustable legs – Operett.
