

MEDLEY STORAGE BOX

Detailed Specification

Our Medley storage box is designed to easily transport our Start Music Stands with Swing Touring Stand Base when you are on tour and need to protect your music stands, while not making them bulky in storage. The box is stackable and has handles, which makes it easy to carry the box. Medley is made of recycled wood, which makes it durable for many years to come. It is also very robust and can withstand being transported on tour buses or planes without damaging either the box or the music stands. The box holds 4 Start Music Stands with Swing Touring Stand Base. The music stands are kept separate in the box with padded boards that have a cushioning effect in the event of impacts, for example.
